THE PRACTICE

pg 03

WE DO NOT BUILD BUILDINGS, WE GROW THEM. A GOOD ARCHITECT ALWAYS
CONSULTS WITH HIS SURROUNDINGS, HE ALWAYS CONSULTS WITH NATURE.
- SYDNEY LEFIFI, PARTNER

MAJOR ROLE PLAYERS

pg 05

WE REGARD THE PROCESS OF ACHIEVING BUILT FORM AS IMPORTANT AS
THE BUILT FORM ITSELF; INTERPERSONAL RELATIONSHIPS AS IMPORTANT AS
TECHNICAL PROCESSES. - EUGENE BARNARD, FOUNDING PARTNER

PROJECTS

pg 07

SERVICE DELIVERY AND THE ACHIEVEMENT OF THE BUILT FORM IS A
COLLABORATIVE PROCESS; CO-OPERATION OVERCOMES CHALLENGES AND
CULMINATES IN SUCCESS.

CONTACT

pg 20

WELCOME TO LEMEG

The Practice

A VERSATILE BUILT ENVIRONMENT STUDIO CENTRED AROUND ARCHITECTURE AND DESIGN IS OUR VISION AND AS A RESULT, OUR DIVERSE GROUP FULFILS DESIGN ASSIGNMENTS ACROSS ALL SECTORS.

The Broad-Based Black Economic Empowerment Act (53 of 2003): Codes of Good Practice on Black Economic Empowerment was gazetted on 9 February 2007. LEMEG Architects took a strategic position and contributes towards this growth strategy. The practice is rated by a registered BEE Verification Agency annually and has been certified as a level Two Contributor.

The practice is fully computerized and utilizes AUTODESK REVIT, AUTODESK 3D STUDIO MAX DESIGN, ARCHICAD, SKETCH UP and ARTLANTIS STUDIO as design and rendering 3D engines. Furthermore, the firm uses AUTODESK REVIT and AUTODESK AUTOCAD as documentation tools. It is equipped with up-to-date computer hardware and large format media printing. The practice is housed in a spacious office building with expansion capacity. LEMEG Architects is a corporate member of the South African Institute of Architects.

The Practice has always been involved in various activities involving local schools. This is aimed at giving scholars the opportunity to better understand the role of architecture in helping to shape a rich physical, social and cultural environment of Limpopo and South Africa at large. It is further to ensure a greater awareness in the young minds of architecture and human relationships with the built environment, the natural world and with each other.

It is by delivering innovative solutions to aesthetic and practical challenges through DESIGN and by adopting a holistic and integrated design approach in the way we create buildings as well as exercising absolute sympathy in all matters that concern our environment that we fulfil the mission to enhance living. Our design strategies and solutions are constantly aimed to aid in comfort, convenience and efficiency in everyday life.

We embrace an idea that a technical role on its own does not represent value when rendering a service. We see value as an on-going engagement with you, our client, towards the excellence of buildings, the way in which buildings communicate to their surroundings, the respect for natural and built environment as well as embracing the collective and individual cultural heritage.

Major Role Players

SMALL FOCUSED GROUP OF BUILDING GROWERS.

SYDNEY LEFIFI

(Pr Arch SAIA) Architect

PARTNER

Sydney celebrates and embraces matters of beauty and coordinates all design responsibilities within the LEMEG Group. He studied architecture at Tshwane University of Technology, specialising in design and attained his Masters Degree in the same field. In 2008 he became a junior partner and shared design and management responsibilities. He has since grown into the partnership and helped to transform the practice into a major player in the Province.

EUGENE V BARNARD

(Pr Arch SAIA FArb) Architect, Arbitrator & Mediator

FOUNDING PARTNER

Eugene is the founding member of LEMEG Architects. He graduated from the University of Port Elizabeth in 1979 with a Bachelor of Architecture after attaining a Bachelor of Building at the same University. After four years in the employ of the South African Railways Architectural Division, he entered private practice. He is a qualified professional architect, a registered arbitrator and mediator. Eugene has extensive experience in the architectural field as well as in contracts and construction law.
